

# DRINKING WATER SYSTEMS

For the Reduction of Sediment, Taste, Odour, Chlorine & Organics

## RESIDENTIAL

### FILTERED WATER ON TAP WHEN YOU WANT IT

#### COUNTER-TOP

**Ideal for apartments, units, holiday homes, boats, caravans, RV's. Complete with Carbon Block Carbon Cartridge for reduction of Sediment, Chlorine, Organic Taste & Odour**  
Sits on top on sink or bench-top. Diverter valve is fitted to tap aerator, simply open diverter valve when filtered water is required. Comprises solid stylish housing with white hygienic finish, heavy duty chrome plated brass diverter valve, inlet elbow and goose neck faucet, soft no-kink white hygienic inlet tubing, housing spanner to facilitate cartridge change, high reach spout with white spout tip

#### DUAL FILTER UNDERSINK with quick-twist disposable cartridges

**Hard plumbed, wall-mountable dual housing, under the sink filter system, with sink-mount water dispensing faucet. Complete with 5.0 micron polyspun filter cartridge for reduction of sediments & carbon block filter for reduction of chlorine, chloramine, taste & odours and protection against giardia & cryptosporidium.** Supplied with all fittings required for installation to standard 1/2" copper pipe: brass compression tee, inlet shut-off valve, pressure limiting valve, backflow prevention device. Includes full-flow faucet, cartridge housing spanner, quick-connect fittings & tubing,

#### UNDERSINK REVERSE OSMOSIS with quick-twist disposable cartridges

**Features 3 filters and 1 RO membrane. Reduces sediment, chlorine, chloramines, taste & odours with 96-98% total mineral reduction, including fluoride.**

Our most popular drinking system. Produces up to 190 litres of high quality water per day. Installed under the sink. Treated water is stored in a pressurised storage tank & supplied under pressure to a dispensing faucet. The system automatically refills the storage tank & shuts-off when full. Complete packaged system includes pre & post carbon filters, RO membrane, storage tank, chrome plated goose bench-mounted faucet, pressure limiting

#### PRF-RO DUAL MEMBRANE REVERSE OSMOSIS UNDERSINK

**Features pre-filter and 2 RO membranes. Reduces sediment, chlorine, chloramines, taste & odours with 95-98% total mineral reduction, including fluoride.**

Deluxe RO system incorporating the latest RO technology. Over 2000 litres per day production. Automatic system for installation under the sink. Does not require a pressurised storage tank. Supplies up to 2.0 litres per minute direct on-line to the dispensing faucet. Complete packaged system includes carbon filter, two (2) RO membranes, chrome plated goose bench-mounted faucet, pressure limiting valve, backflow prevention, shut-off valve, high pressure tubing & fittings.
